Client Project Final Deliverable

By: Emir McGreevy

Design Overview

- Athlete focused website
  - Roster Pages
  - Individual Profiles for each runner
- Home page has an overview of season schedule
  - Updates, events, etc
- Design inspired by my time as an athlete and the information that I would have liked to have

Roster Pages

- Created a Python code that reads in the data from the csv files to create roster pages for each individual team

```python
def main():
    # Generate Men's Team Roster Page
    folder_path = 'mens_team/'
    csv_files = glob.glob(os.path.join(folder_path, '*.csv'))
    athletes = []

    for file in csv_files:
        athlete_data = process_athlete_data(file)
        filename = os.path.basename(file).replace('.csv', '.html')
        athlete_data['profile_url'] = os.path.join(folder_path, filename)
        athletes.append(athlete_data)

    gen_team_roster_page(athletes, 'mens_roster.html', "Men's Team Roster")

    # Generate Women's Team Roster Page
    folder_path = 'womens_team/'
    csv_files = glob.glob(os.path.join(folder_path, '*.csv'))
    athletes = []

    for file in csv_files:
        athlete_data = process_athlete_data(file)
        filename = os.path.basename(file).replace('.csv', '.html')
        athlete_data['profile_url'] = os.path.join(folder_path, filename)
        athletes.append(athlete_data)

    gen_team_roster_page(athletes, 'womens_roster.html', "Women's Team Roster")

if __name__ == '__main__':
    main()
```

Women's Team Roster

Name
Ayla Balazer
Lucia Llanes
Ann Kececi
Arabella Kessler
Nina Beals
Ruthie Scott
Katie Yuan
Elin Tenbrink
Julianna Heung
Alexandra Wren
Grace Hopkins
Gwen Stotts-Walshe
Emily Mei
Becca Van Lent

Color Schemes

- Same format as light mode
- Theme based off of school's colors
  - Makes for a more unique and engaging experience for users

Thanks!

Any Questions?
